J.Costa se reserva el derecho a efectuar modificaciones de sus productos sin previo aviso. Las marcas registradas que aparecen, se entienden exclusivamente como referencias para la utilización de los productos J.Costa como recambios de scooter.

Our History

J.COSTA was born in 2002 and together with I&T Scooter is established as one of the main variator manufacturers in the motorcycle industry. Tradition, experience, market knowledge and a commitment with innovation have made us leaders in our field. In order to maintain our advantage and remain on the cutting edge, J.COSTA relies on advance Research & Development team. All the products that we develop are submitted to a deep and quality control to guarantee their complete safety. According to this and working closely with our customers, our products have a standard above the average of the industry. Furthermore, J.COSTA's innovation policy has been developed in the most demanding laboratories: Top-level competition. And in this arena where we have certified J.COSTA as an internationally recognized and reliable brand name.

As previously mentioned, J.COSTA has always been in the field of high competition testing. In 2011 and 2012 with Maverick Viñales in the 125cc and Moto3 category of the World's Premier Motorcycling Championship, the world's top motorcycle competition. This competition belongs to the International Motorcycle Federation (FIM) and managed by Dorna.

From 2010 until now has been with it is official driver Montse Costa in the European Motorcycling Championship, also called FIM CEV Repsol. The most important motorcycling Spanish competition disputed nationally for more than forty years, created by the Royal Spanish Federation motorcyclist, who emerged to boost the Spanish drivers, improving their performance in international competitions.

In 2015, J.COSTA went to different circuit events with different T-MAX Club members from all over Spain. In addition, has participated the Championship of Catalonia with automatic mopeds, since in this way the variators of 50cc are evolved. J.COSTA is starting a new project, the manufacture of its own automatic engine. He has also been with Isaac Viñales in the World Motorcycling Championship with Moto 3.

J.COSTA is present in many world fairs, like the EICMA Fair in Milan (Italy), the most important fair in the world of motorcycling. J.Costa is present in national fairs as Barcelona or Madrid, and it is also necessary to mention that J.COSTA is visiting other world motorcycle fairs, such as Intermot in Germany.

J.Costa wants to assume great challenges and takes the commitment to go to more fairs every year, either to give support and advice to our distributors or to expose their products.

Nuestra Historia

J.COSTA nace en 2002 y junto a I&T Scooter se ha consolidado como uno de los principales fabricantes de variadores en el sector de la automoción. Tradición, experiencia en el campo, conocimiento del mercado y una apuesta decidida por la innovación la sitúan como la empresa líder del sector. Para estar a la vanguardia del mercado y dar respuesta a la velocidad de la innovación que exige la industria, J.COSTA cuenta con un avanzado Departamento de Investigación y Desarrollo. Todos y cada uno de los productos que desarrolla, antes de salir de fábrica, se someten a un estricto control de calidad que garantiza su máxima seguridad. De hecho, gracias al trabajo conjunto con sus clientes se logran superar los estándares vigentes. La política de innovación de J.COSTA ha sido desarrollada en los mejores laboratorios posibles. Los circuitos de alta competición certifican la marca J.COSTA y reconocen la empresa como fabricante de ámbito internacional.

Desde 2010 hasta ahora ha estado con su piloto oficial Montse Costa en el Campeonato de España de Velocidad también llamado C.E.V Repsol, ya que es la competición motociclista más importante disputada a nivel nacional desde hace más de cuarenta años. Fue creada por la Real Federación Motociclista Española, para impulsar a los pilotos españoles, mejorando su rendimiento en las competiciones internacionales.

Como anteriormente se ha comentado, J.COSTA siempre ha estado en el campo de pruebas de la alta competición. En 2011 y 2012 con Maverick Viñales en la categoría de 125cc y Moto 3 del Campeonato de Velocidad del mundo, que es la máxima competición de motociclismo de velocidad. Esta competición está dirigida por la Federación Internacional de Motociclismo (FIM) y gestionada por Dorna.

En 2015, J.COSTA participa con Isaac Viñales en el Campeonato del mundo de Velocidad en Moto 3 y en diversos eventos de circuito con usuarios del T-Max Club de toda España. Además asiste al Campeonato de Cataluña de ciclomotores automáticos, lo que le permitirá evolucionar los variadores de 50cc e iniciar un nuevo proyecto que se basará en la fabricación de su propio motor automático.

J.COSTA está presente en todo tipo de ferias mundiales, actualmente y la más importante en el mundo del motociclismo, la Feria de EICMA en Milán (Italia), además también va a ferias nacionales como la de Barcelona o Madrid. También es necesario nombrar que J.COSTA va de visita a otras ferias del sector del motociclismo mundiales, como es Intermot de Alemania.

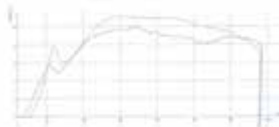

Cabe decir que J.Costa quiere asumir grandes retos y se propone cada año ir a más ferias ya sea para dar soporte y asesoramiento a nuestros distribuidores como para exponer sus productos.

VARIATORS

VARIADORES

TRANSVERSAL VARIATOR AND WORKING

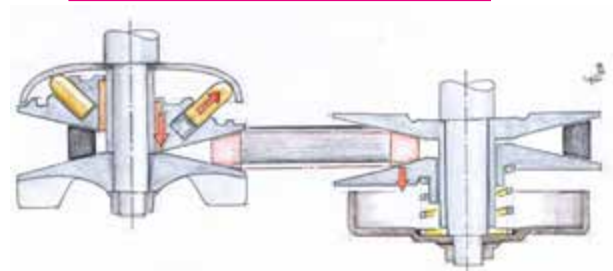

VARIADOR TRANVERSAL Y SU FUNCIONAMIENTO

The difference between the J.Costa variator and the original, in addition to its extraordinary design is the functionality. In the original variator, the rollers are pushed to outside, because of the inertia in the acceleration, and fall to lead in the deceleration. In the J.Costa variator the rollers are pushed to the outside as in the original but with the difference that retreat progressively in the deceleration. This implies that with the J.Costa variator when accelerating, between regimes, the recovery is much more faster.

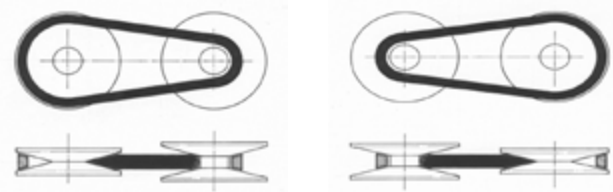

La diferencia entre el variador J.Costa y el original, además de su extraordinario diseño es la funcionalidad. En el variador original, los rodillos son empujados hacia el exterior, como consecuencia de la inercia en la aceleración, y caen a plomo en la desaceleración, en cambio, en el variador J.Costa las masas son empujadas al exterior igual que en el original pero con la diferencia de que se repliegan progresivamente en la desaceleración. Esto implica que con el variador J.Costa, al acelerar entre regímenes, la recuperación es mucho más rápida.

Transversal variator J.Costa

J.Costa has always chosen innovation. Innovation and Technology is in our blood. To be is not enough; we are fighting everyday and working hard to be the number one. With J.Costa you will be number one on Performance; you will have full control of your vehicle, fulgurating accelerations, better throttle response, more torque available at all times... you will enjoy unknown sensations that you've never imagined with your scooter. With J.Costa you will be the number one on Technology; with J.Costa you will have our exclusive and patented technology of the variator.

www.jcosta.com

ROLLERS

Plastic weights injected in high-resistance material, Kevlar and carbon fiber reinforced to high durability and optimum sliding

BUSHING

Bronze inner bearing, self-lubricated with graphite inlay (no grease needed).

BODY

Hardened aluminium CNC machining done under high-quality or with ceramic treatment

SLIDER

Collar hardened by titanium nitride and graphite (with antifriction treatment).

PRESSURE- DEPRESSION EFFECT

Of the rollers cavities are holed for the pressure-depression effect make them to act more quickly and smoothly both at the entrance to a higher gear as the output of a lower gear showing no jumps, using the air as fluid dynamic to help the rollers to emerge or be collected faster without increasing fuel consumption.

HEATSINKS

Within the speed control in a circle provided with projections, between rollers area and bushing area

Series:
XRP

MAIN FEATURES

- Improve in:
 - o Smoother performance.
 - o Higher refrigeration allowing less temperature due to the new variator design with sink.
 - o Better aerodynamics.
 - o Weight reduction (inertial control).
 - o Higher quality for all components of speed control, higher durability and less maintenance.
- We get
 - o Faster performance.
 - o Higher reaction on the throttle, thanks to the effect Press-Depress of rollers.
 - o Reduction of the fuel consumption.
 - o Faster operation.

Series:
PRO

Transversal variator J.Costa

J. COSTA ha escogido siempre el camino de la innovación. Innovación y tecnología es lo que corre por nuestras venas. Ser, no es suficiente motivación, lo importante es luchar, competir y trabajar para ser el número 1. Con J. COSTA serás el No 1 en Prestaciones; con J. COSTA tendrás todo el control en el puño del gas, una suavidad de funcionamiento increíble, aceleraciones fulgurantes, empuje en medios, mayor rapidez para llegar a la velocidad punta y recuperaciones que nunca imaginaste. Con J. COSTA serás el No 1 en Tecnología; con J. COSTA tendrás la tecnología exclusiva y patentada del variador transversal®.

www.jcosta.com

MASAS

Material de plástico de alta resistencia, con un compuesto de Kevlar y fibra de carbono para un mejor deslizamiento y durabilidad

CASQUILLO

Central de bronce con incrustaciones de grafito para lubricar en seco. (Nunca necesita grasa)

CUERPO

De aluminio mecanizado en CNC con un tratamiento cerámico

BULÓN

De acero inoxidable con tratamiento de Nitruro de Titanio con Grafito (tratamiento anti-fricción)

EFEECTO PRESIÓN - DEPRESIÓN

Las cavidades de las masas están agujereadas haciendo que éstas actúen más rápida y suavemente tanto a la entrada de una marcha superior como en la reducción a una marcha inferior sin apreciarse saltos, es decir, aprovechar el aire como fluido dinámico para ayudar a las masas a emerger o bien recogerse de una forma más rápida sin aumentar el consumo de combustible.

DISIPADOR DE CALOR

En el interior del variador en forma de círculo dotado de resaltes, de manera que se disminuye la temperatura y se reduce el peso.

Serie: XRP

Serie: PRO

CARACTERÍSTICAS PRINCIPALES

- Mejoramos en:
 - o Mayor suavidad de funcionamiento.
 - o Mejor aerodinámica.
 - o Reducción de peso (control inercial).
 - o Menor temperatura en el interior del variador, gracias a su diseño revolucionario con disipador.
 - o Mayor calidad de todos los componentes del variador, aumentando así su durabilidad y menor mantenimiento.
- Conseguimos:
 - o Funcionamiento más rápido
 - o Una mayor reacción al Puño del Gas, gracias al efecto Presión-Depresión de masas.
 - o Una reducción del consumo de combustible.

QUICK PRICE GUIDE

GUIA RAPIDA DE PRECIOS

Depending on the c.c. engine of your model you will know the price of the variator. Then you should have a look at the brand, c.c. and model.

En una sola ojeada, puede saber los precios por cilindrada. Después busque en la tarifa por marca, cilindrada y modelo.

CLUTCHES

EMBRAGUES

Transversal J.Costa clutch

Once again, thanks to the constant work of our R+D department, we are always investigating and innovating to offer you the best of the market.

For this reason, we are presenting a new product to the market, the unique and revolutionary TRANSVERSAL J.COSTA CLUTCH, with its patent.

The most characteristic thing its operation. It has a revolutionary system, where thanks to the centrifugal force, the weights work as a transversal way, pressing the springs and these to the disks. The operation is so similar to the J.Costa variator.

The design and production, is done by aluminium CNC machining with a hard anodized treatment to get more durability, as also, lubrication and refrigeration.

www.jcosta.com

COUNTERWEIGHTS
high resistance machining, with iron compound .

SPIDER
Stainless steel. Subjection central counterweights lowered for more lubrication.

BODY (Clutch bell)
7075T machined in CNC with a hard anodizing treatment for durability.

KEY FEATURES

Performances and feelings that you will get:

- Aggressive and faster snatch.
- More reaction and sensibility in the throttle.
- Increase the brake engine.
- More retention when you close the throttle.
- Less extreme use of the brakes.

Transversal J.Costa clutch

Una vez más, gracias al trabajo constante de nuestro departamento de I+D, seguimos investigando, seguimos evolucionando.

Por ello, presentamos un nuevo producto al mercado, el único y revolucionario EMBRAGUE J. COSTA TRANSVERSAL, con su patente incorporada.

Lo más característico, su funcionamiento. Cuenta con un sistema revolucionario en el que, gracias a la fuerza centrífuga, los pesos se mueven de manera transversal y muy similar al variador J. Costa, presionando los muelles y éstos a los discos.

Su diseño y fabricación, se realiza mediante mecanizado de aluminio CNC con un tratamiento de anodizado duro para el aumento de su durabilidad, así como una mayor lubricación y refrigeración.

Pero sobretodo, cabe destacar, que se puede apreciar con mucha suavidad sin brusquedades, como el embrague actúa y desactúa en movimiento.

www.jcosta.com

CONTRAPESOS

Mecanizado de alta resistencia, con un compuesto de hierro .

ARAÑA

De acero inoxidable. Sujeción central de los contrapesos rebajada para una mayor lubricación.

CUERPO (Campana de embrague)

De aluminio 7075T mecanizado en CNC con un tratamiento de anodizado duro para su mayor durabilidad.

CARACTERÍSTICAS PRINCIPALES

Prestaciones y sensaciones que se obtienen

- Una salida más agresiva y rápida.
- Una mayor reacción y sensibilidad del puño de gas.
- Un incremento del freno motor.
- Mayor retención al reducir el gas.
- Menor uso extremo de los frenos.
